

Rightcentive

Brokerage Management System

“A web-based enterprise-class application that empowers companies to automate and streamline Brokers and their Commissions”

Rightcentive allows users to create and govern real estate transactions in a better way. Rightcentive with incorporated modules clears all multifaceted real estate needs and plans an easy-to-use approach for real estate agents, usually known as brokers. Helps improve manual systems which encompass

complex calculations, appropriate distributions which have to be done prudently. This is absolutely time taking and often puzzling too.

Rightcentive removes such obstacles to offer a clear and systematic methodology and stir real estate industry with profits & performance optimization. In addition, there would be a maximum level of cost reduction and augmented operational efficiency resulted.
