“Efficiency is doing things right; effectiveness is doing the right things at right time.”

– Peter Drucker

VARSun ETECHNOLOGIES GROUP INC.

was founded in 2003, and is a CMMI certified Maturity Level 3 company headquartered in Anaheim, CA, USA. As both a manufacturing and IT services company, we have grown to over 300 employees and continue to expand our operations and products. Through our IT Services business, we have an extensive background in leading enterprise applications, which is why we are able to identify and develop powerful solutions that are both easy to use and highly secure. We are entrepreneurs at heart, we do more than just sell products and services. We take your success seriously and fully engage with you to help ensure you reach your goals.

WHAT IS BEYOND TIME ?

Time and Project Management systems are crucial for businesses to enhance productivity and track work completion. To effectively improve the work culture of any organization, management requires tools that can facilitate this change. Beyondtime is a cloud based solution that is designed specifically for this purpose. You will immediately improve productivity, communication and transparency throughout your company.

With Beyondtime you can compare project costs, track deliverables, manage resources, track and resolve customer tickets, organize and view documentation, and monitor timesheets. The ease of access to information and communication allows project managers and participants to be more efficient, anytime, anywhere, on any device. All employees can plan and organize their work providing managers with the information and transparency they need including exception based reporting.

METHODOLOGIES

Beyondtime supports waterfall and agile project management methodologies. Waterfall methodology is based on a sequential design process and is meant to be used for larger projects and organizations that require stringent stages and deadlines. The main advantage of this methodology is it can be easily adaptive to shifting teams, forces structured organization when designing the project, allows for early design changes, and is suited for a milestone focused development.

A photograph of two men in business suits. The man on the left has a beard and glasses, and is pointing at a document held by the man on the right. They are standing in an office with a desk and computer equipment visible in the foreground. A blue semi-transparent box is overlaid on the left side of the image, containing a quote.

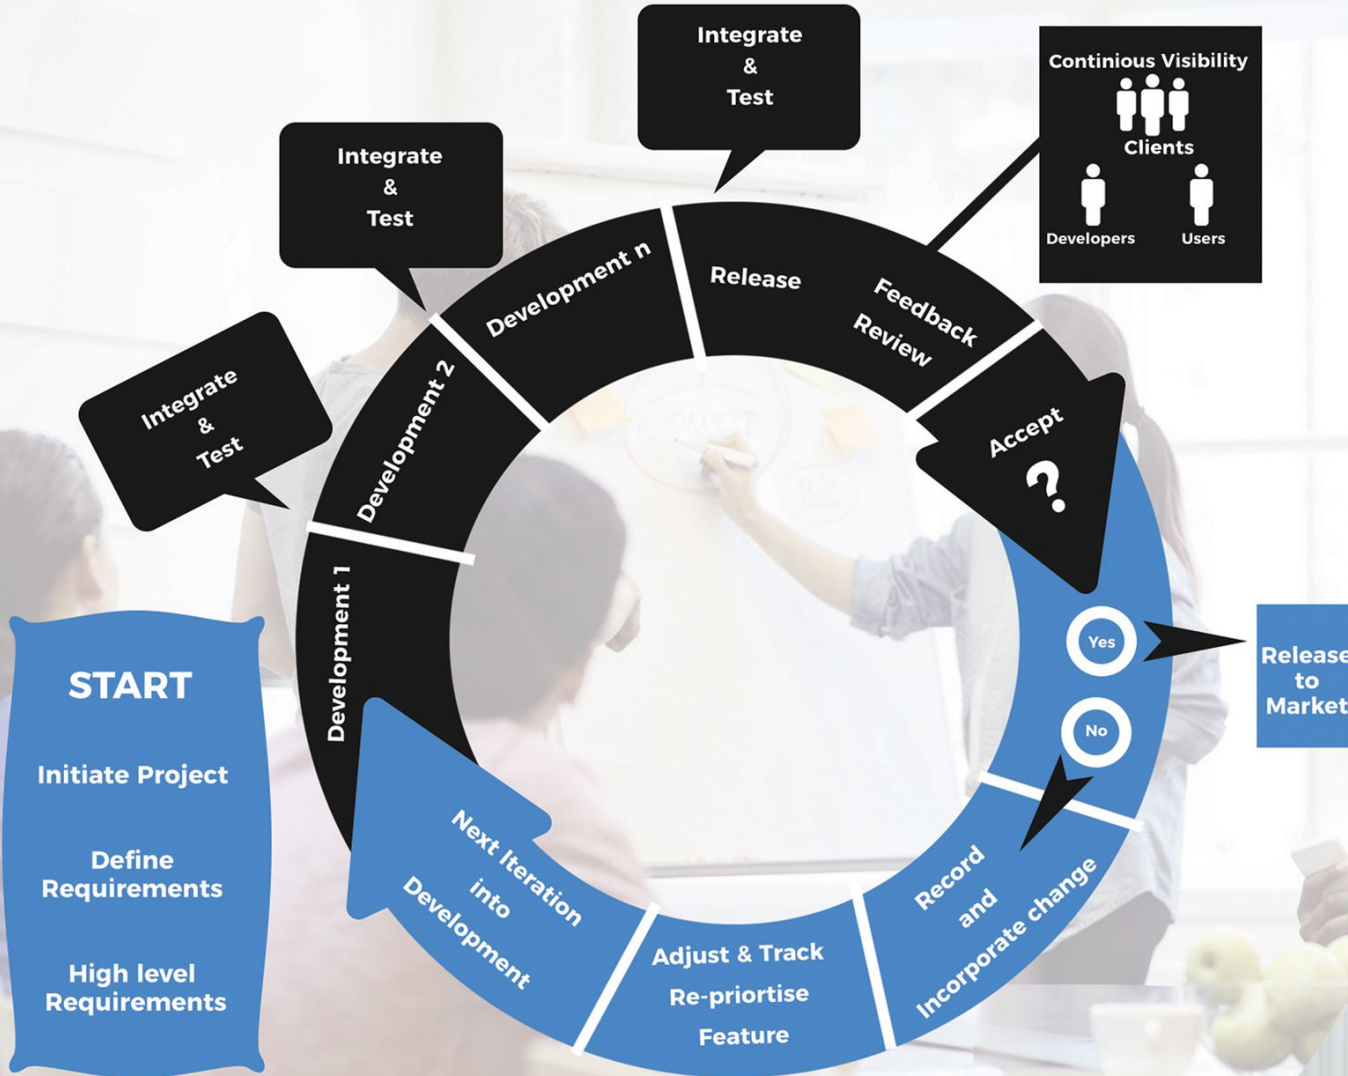

**“Think ahead. Don’t let
day-to-day operations
drive out planning.”**

- Donald Rumsfeld

**“The bad news is time flies.
The good news is you're the pilot.”**

- Michael Altshuler

Agile methodology is a more incremental design model. This form of project management should be used when implementing new changes or new features to an existing product or project. Some of the main advantages of an agile model is it uses less documentation and saves a lot of time and money. New change requests or enhancements can be easily implemented without considering budget constraints. Furthermore the agile model allows you to recognize gaps in requirements or technology much quicker and easier. Both methodologies are meant to streamline and improve communication for any type of pro-

OUR MODULES

1. HELPDESK

IMPROVE CUSTOMER SUPPORT TEAM CAPABILITIES, AND ENHANCE COLLABORATION AND COMMUNICATION TO RESOLVE CASES EFFECTIVELY.

2. TIME

Monitor employee work and productivity. Generate timesheets and reports for appraisals and employee reviews.

3. DOCUMENTS

Document management system to upload, organize, and track documents and changes made to them.

4• MY WORK

Drive productivity of your employees with dashboards detailing their worklist, including tasks and approvals.

5• REPORTS

Time reports, burndown rates, team and resource efficiency can all be tracked and placed in consolidated reports for managers to analyze.

6• PROJECTS

Create programs and projects, assign resources, manage tasks, deadlines and ensure quality and completion of work. We support agile and waterfall project methodologies.

01

Automated Payroll and Time Control

Running a payroll that involves tracking employee time and attendance on time cards and time sheets can be highly stressful and can easily become costly, and time consuming. Especially for big companies with hundreds or thousands of staff. In order to stay competitive in today's tough economy, our auto payroll and time control features will simplify work that is overwhelming or time consuming.

02

Real time workforce and resource visibility

Gain complete visibility of your workforce and the resources you can utilize by having real time access to time reports and burndown charts. When reviewing and assigning employees you will have an extensive amount of data to assess their value and their capabilities. Track work completion and employee productivity.

03

Improve customer support capabilities

Our Helpdesk module is designed to track and resolve tickets from customers, giving your support team all the tools to maximize efficiency and customer satisfaction. Beyond Time has automated analytical tools and dashboards to organize tickets and improve communication across various departments to fix the

04

Utilize Resources efficiently to maximize productivity

You can track employee work, their timesheets, and plan projects accordingly. This allows you to focus on priorities, adapt to changes through smart scheduling and visualize resource availabilities for the project. Utilizing this information effectively can drive productivity while simplifying work for project leads and managers.

05

Run each project to its highest potential profit

Manage every project to its highest potential profit, and keep tabs on your costs of delivery and ROI. Automated budget tracking tools gives team and project leads all the information required to ensure completion of deadlines with the highest potential profit margins.

06

Organize and Track Changes to Documentation

Beyondtime's document module is a fully integrated document management system. Check in and check out documents with ease to manage, organize, and view company documents.

Organizations using Beyond-time for automated time and attendance tracking achieve significantly greater workforce capacity utilization than those with manual time and attendance processes
